| Activity | <p><u>Weston/START CBR 1 Team Activity:</u></p> <ul style="list-style-type: none"> Oversaw Enbridge Field Team including Eli Eversole (AECOM) and Amber McDougale (AECOM), and Susan Jones (MDEQ) in the morning, and additional staff for completing monitoring and sampling of sediment trap jar sediment sampling devices and reinstallation of the devices. <p><u>CSKR2150 sediment trap location</u></p> <ul style="list-style-type: none"> Completed the monitoring and collection of the sediment trap jar sampling devices and reinstallation of the devices at the 21.50 sediment trap location. Samples were collected from all three locations, C01, C02 and C03. Clean, empty jars were reinstalled when the samplers were placed back in the river. The sampling device locations are labeled CSKR2150 (C01, C02 and C03). The jar information is detailed below: C01 – jars had 89mm and 78mm of soft sediment in each jar, no sheen, no globules were observed, sampler device was tilted slightly toward the upstream direction C02 – jars had 121mm and 127mm of soft sediment in each jar, no sheen, no | | | |

|---------------------------------|---|
| | <p>globules visible C03 – jars had 161mm and 159mm of soft sediment in each jar, no sheen, no globules were observed</p> <ul style="list-style-type: none">• They also collected poling data from 5-8 locations along transects at each of the 3 sediment sampling device locations. Poling data was 0 none, 12 light, 4 moderate, 3 heavy. All temperatures were above 60.• Also collected depth from top of surface water to top of sampling devices for ones below water C01 – 11” and 15”; sampler device was tilted slightly toward the upstream direction resulting in the two measurements C02 – 14” C03 – 2” |
